

## MAK FLASH SEAL

Self Adhesive Flashing Tapes

### Description

MAK FLASH SEAL is a self adhesive sealing bitumen modified aluminium finish strip, which bonds instantly to provide permanent watertight seal. It is easily applicable on roofs using hand pressure.

### Features

- ◆ Quick and easy to apply
- ◆ Excellent bond to most building materials
- ◆ Excellent bond to all bituminous substrates
- ◆ Instant watertight seal

### Area of Application

MAK FLASH SEAL bonds to most building material including brick, masonry, slates, concrete, wood, metal, etc. It can be applied to large variety of maintenance areas including drain pipes and gutters, roof joints, felt joints, etc.

### Application Procedure

- ◆ The surface to be repaired, should be free from all loose particles, dust, oil and laitance.
- ◆ Cut MAK FLASH SEAL in required length. Remove appx. 50mm of release backing paper and carefully position the sealing strip.
- ◆ To avoid creasing, hold the release backing paper firmly and remove it steadily from the sealing strip as the product is applied.
- ◆ Smooth gently into position using hand pressure. Avoid excessive pressure.

### Technical Specifications

Finish	Aluminium Finish/ Plain finish available on demand
Composition	Resin modified bituminous mass
Weight	1.6 Kg psqmt

## Size

MAK FLASH SEAL is available in below mentioned sizes:

100 mm X 5 Mtr

150 mm X 5 Mtr

200 mm X 5 Mtr

100 mm X 10 Mtr

150 mm X 10 Mtr

200 mm X 10 Mtr

Other sizes available on demand.

## Storage

Store under cover, out of direct sunlight and protect from extremes of temperature.

Failure to comply with the recommended storage conditions may result in premature deterioration of the product or packaging.

## Limitations

- ◆ Not suitable for Polypropylene, Polystyrene and teflon.
- ◆ Not suitable for sealing of high pressure systems.

## Disclaimer

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.
