TIRI SYSTEM'S WATER TANK COVERS

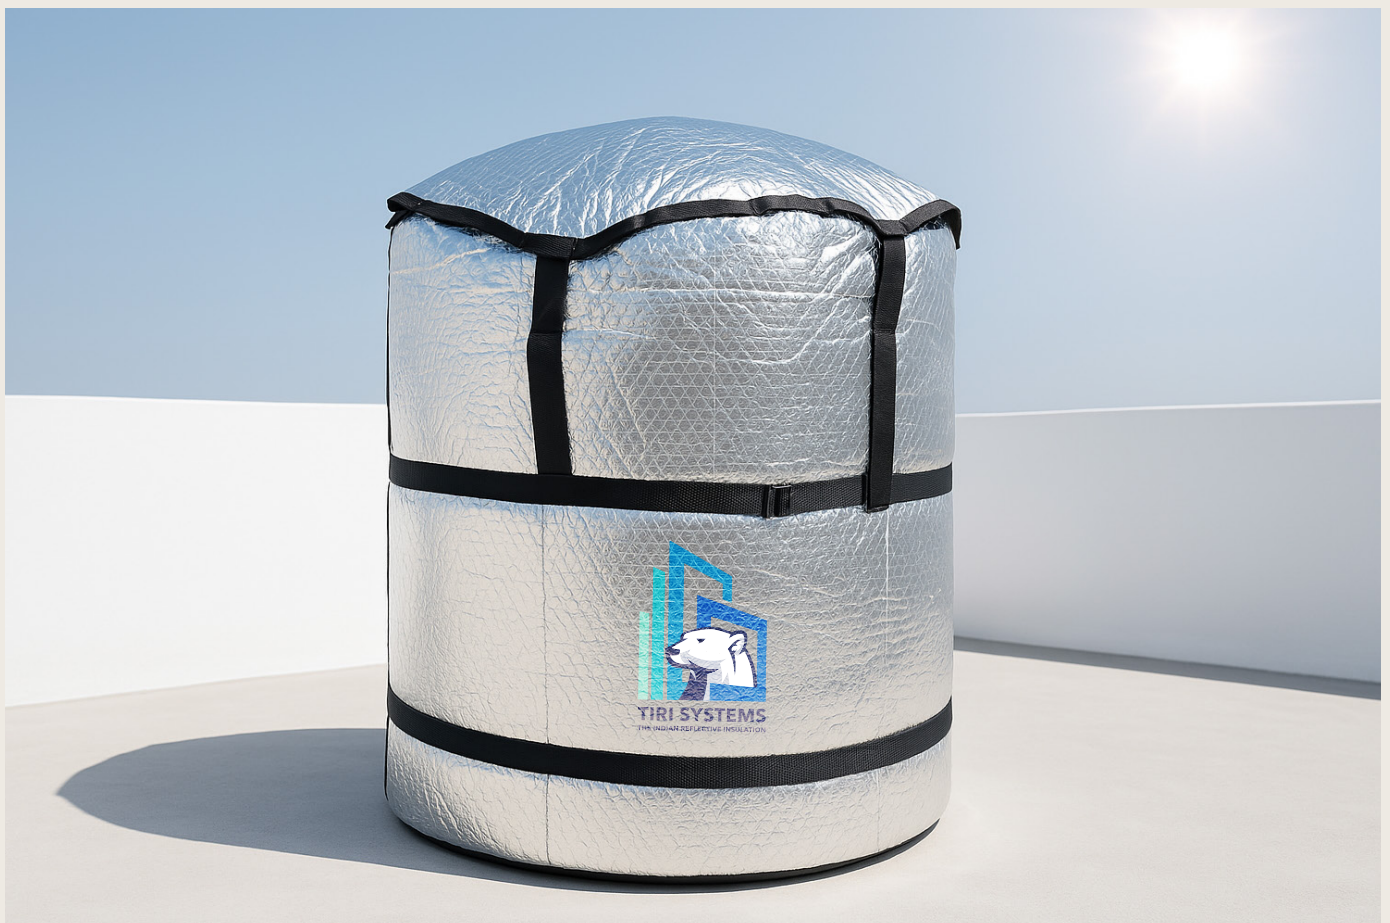

Keep Your Water Clean, Cool, and Fresh!

Introducing Tiri Water Tank Covers, the perfect solution for efficient and sustainable water management. These covers protect your water supply from contamination and reduce algae growth while conserving resources.

Designed to block pollutants and limit sunlight, Tiri covers maintain optimal water temperature and minimize evaporation, significantly cutting maintenance costs. With robust protection against harmful UV rays and an attractive design, they enhance both water quality and your surroundings.

Easy to install and customizable to fit various tank sizes, Tiri Water Tank Covers are a smart investment for a cleaner, healthier water supply. Elevate your water storage solution with Tiri today!

Advanced Thermal Insulation
Keeps water cool in summer and warm in winter.

Durable & Weather-Resistant
Built to last through harsh weather conditions any season.

Easy Installation
User-friendly setup process, install in less than 10 minutes.

Energy Efficient
Helps reduce electricity bill by maintaining optimal temperature.

Enjoy perfect water temperature year-round!

A Uniform Temperature In All Seasons

Therma Covers uses advanced technology to regulate water temperature, keeping it optimal at 30°C to 35°C year-round. It prevents overheating in summer and excessive cooling in winter, ensuring ideal water conditions regardless of the weather.

Reduced Maintenance For R.O. Water Filters

In summer, plastic tanks can heat water to 60°C to 70°C, impacting R.O. filter efficiency and lifespan. Therma Covers stabilizes water temperature, minimizing maintenance needs and extending the life of R.O., UV, and other purification systems.

Prevention Of Cancer And Other Diseases

Hot water in plastic tanks during summer can release harmful chemicals, posing health risks like cancer. Therma Covers maintains stable water temperatures, ensuring safe drinking water.

Save Significantly On Electricity Bills

Therma Covers keeps the water in the tank warm during winter, reducing the need of electric heaters and other heating devices. Thus, saving you between 60% and 70% on electricity bills.

QTY	Dia in inch	Height in inch
500 L	42	39
750 L	43	46
1000 L	48	48
